To Journal on Interactive Systems editors

Dear Editor and reviewers,

Thank you for your comments. We considered them to improve the text, especially the results chapter. We tried to attend to every comment. In this summary of differences, we highlight the new additions in the text:

- We attend to the observations about images and references.
- Also, we reorganized the results chapter to present it more clearly. Now, we divided the three experiments into subsections. We worked to try to attend to comments about the experiments, such as ethical characterization and patient profiles.
- We adjusted the abstract, considered the suggestions, and worked to try to find the errors in the text.

Sincerely,

Rafael Luz Melo
